Mobile wireframes, low fidelity

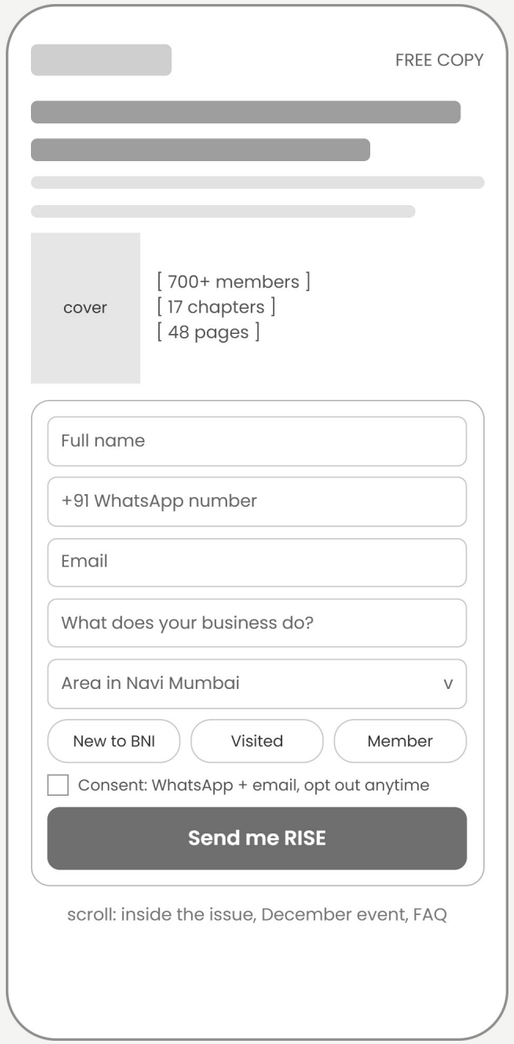

Almost every tap comes from WhatsApp, so the funnel is designed phone-first. Four screens, one job each.

Grey = placeholder. Words in brackets = content to finalise.

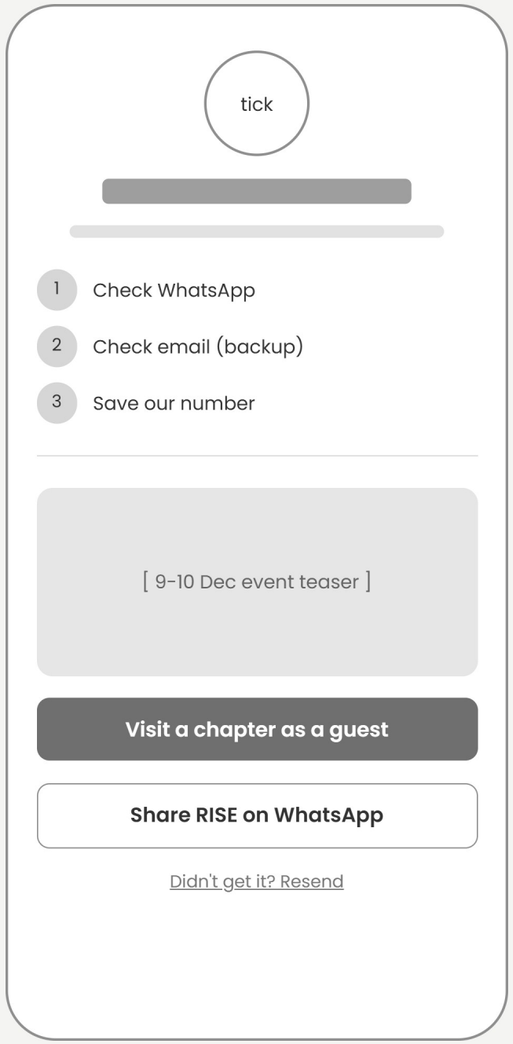

1. The blast

Cover image first. Two lines of why. One link. Ask members to forward it to one business owner.

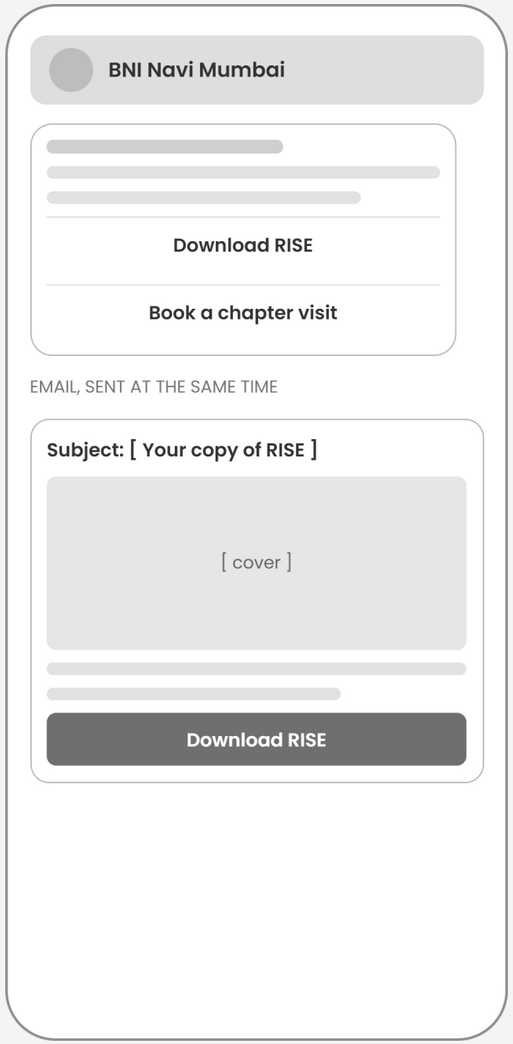

2. Landing page

Form above the fold on a phone. Proof next to it. Everything else sits below for people who scroll.

3. Thank-you page

No download button here. The link only arrives on WhatsApp and email, so every lead is a verified number.

4. Delivery

Approved WhatsApp template with two buttons. Email carries the same tracked link as backup.
